OPEN EDUCATIONAL RESOURCE (OER) CHANNELS

There are lots of fantastic open collections of images, textbooks, and other resources where you can find a wide range of high-quality content for your course. Here are some useful websites worth bookmarking:

Images, video and audio

Media Hopper Create is the University of Edinburgh's own media platform, where staff and students share media internally and publicly. Select 'Creative Commons' at the top of the page to see a large range of video content available for download and re-use. You can filter by channel too so you can browse by topic or course title.

YouTube has lots of great media by reputable academic institutions and organisations which can be embedded into your course. You can use YouTube videos in your course as long as you embed them using a direct link or the YouTube embed code. If the YouTube video has been released under Creative Commons licence, it's important that you include the appropriate attribution.

- Creative Commons Search (check the 'Use commercially' box for content that can be used on open learning platforms).
- Europeana.
- Flickr (select the 'Commercial use & mods allowed' from the dropdown 'Licence' menu when searching).
- Pexels (images and videos).
- Pixabay (images, illustrations, vector graphics, and videos).
- Pixnio.
- Public Domain Review.
- Unsplash.
- Wikimedia Commons (always check the licence information at the bottom of the page).

Textbooks, journals and articles

- arXiv.org.
- Directory of Open Access Journals.
- Open Humanities Press.
- OpenStax College.
- Public Library of Science (PLOS).
- PubMed (search for "Free Full Text").

You can find more information on the University's Open.Ed website.
