- CC - Community College
- ELs - Educational Leaders
- HE - Higher Education
- SSA - Same-sex Attraction

Pre-Higher Education Level

Graduation from Higher Education

Some LGB students become aware of their SSA.

Some LGB students begin to share their assumed sexual identity with trusted others.

Some LGB students begin to experience homonegativity...This continues into HE.

Some LGB students become more accepting of their SSA, and continue coming-out to trusted others.

First crisis event related to some students' assumed/known queerness.

Second crisis event. This one however is likely to result in some students being transferred to another high school or a CC. Crises of this kind in rural areas involve the school's campus and may spread to the surrounding community/ies.

At the end of grade 11, some students may not be allowed to re-enroll for 6th Form, and so may begin CC or relocate to another parish.

Some students begin to form meaningful social and sexual relationships.

Primary School

GRADES 9-11 High School

Higher Education

Inculcation of religious values which are homonegative.

Homonegativity by peers.
Homonegativity/harassment more likely to be reported to ELs.
Depressive symptoms and suicidal ideation.

LGB students are, more likely to graduate high school..

Cessation of active involvement in Christianity/church. Homonegativity perpetuates into HE and expands from peer groups to include faculty and other staff – including contracted personnel such as security guards.

But some are less likely to graduate from HE. They may withdraw or even transfer to another HE resulting from increased homonegativity.

Some attempt to change sexual orientation from LGB to straight.

Shame removed about sexual identity, but guilt remains about sexual behaviours.

Some LGB students frame a relationship with/concept of God which accommodates their sexual identity.

Harassment NOT likely to be reported to ELs.
Major depressive disorder along with suicidal intent/completed suicide.
